MARYLAND STATE DATA CENTER

The Maryland State Data Center (SDC) is an official partner with the U.S. Census Bureau. The Maryland Department of Planning coordinates the SDC program in Maryland.

The SDC monitors development trends, analyzes social, economic and other characteristics and prepares population, housing, employment, labor force, and income projections, which provide the baseline for planning for growth and development in the State.

The Data Mine Blog

A blog by the Maryland State Data Center

About

The Data Mine is a publication of the [Maryland State Data Center](#) (MSDC), a division of the [Maryland Department of Planning](#). The MSDC, or the "Data Center" as it is known, monitors development trends, analyzes social, economic and other characteristics and prepares population, housing, employment, labor force, and income projections, which provide the baseline for planning for growth and development in the State.

The Data Mine blog posts articles and commentaries having to do with U.S. Census data, socio-economic trends, population and household projections and all things demographic. The blog's principal contributors are Mark Goldstein, manager of MDP's Demographic & Socioeconomic Projections Unit and Jane Traynham, manager of the Maryland State Data Center.

This blog will inform, illuminate and, hopefully, entertain you about data.

The Data Center is an official partner with the [U.S. Census Bureau](#). The Maryland Department of Planning coordinates the SDC program in Maryland.

2012 Census of Agriculture For Maryland and its Jurisdictions

The Census of Agriculture is the leading source of facts and figures about American agriculture. Conducted every five years, the Census provides a detailed picture of U.S. farms and ranches and the people who operate them. It is the only source of uniform, comprehensive agricultural data for every state and county in the United States.

The 2012 Census of Agriculture collect information concerning all areas of farming and ranching operations, including production expenses, market value of products, and operator characteristics. This information is used by everyone who provides services to farmers and rural communities - including federal, state and local governments, agribusinesses, and many others.

Economic Census

The Economic Census (or census) is a periodic statistical program that obtains information about virtually every U.S. business and publishes our Nation's most used and useful business statistics. The U.S. Census Bureau conducts the census every 5 years. It provides information for calendar years ending in "2" and "7."

Economic survey produced by the US Department of Commerce every five years. 2007 is the most recent version available with selected statistics by economic sector and sub-sector for Maryland in the North American Industry Classification System (NAICS).

Estimates

This section contains estimates of various socioeconomic variables. An estimate differs from a projection in that it is for either the current year or a past time period. Projections deal with the future and can be found under the [Projections](#) tab.

Estimates of Jobs by Place of Work and Personal Income can be found at the [Jobs and Income](#) Tab. A good summary of estimates covering a wide variety of socioeconomic variables can be found in our [Maryland Statistical Handbook](#)

Estimates can be divided into five basic categories:

Population :

► Post 2010 U.S. Census Bureau Population Estimates :

- [2013 Estimates for Maryland's Municipalities \(5/14\)](#) **new**
- [2013 Estimates for Maryland's Jurisdictions \(3/14\)](#)
- [2013 Estimates for Maryland and All States \(12/13\)](#)
- [2012 Estimates by Age, Race and Gender for Maryland and it's Jurisdictions \(6/13\)](#)

► U.S. Census Bureau Intercensal Population Estimates 2000 to 2010 for Maryland (4/12) :

- Total Population Estimates: [PDF](#) | [XLS](#)
- [Estimates by Gender and Age Group](#)
- [Estimates by Gender, Race and Hispanic Origin](#)

► Revised U.S. Census Bureau Intercensal Population Estimates 1990 to 1999 for Maryland

► Median Household Income for Maryland's Jurisdictions and Places (12/13)

► Poverty Rates for Maryland's Jurisdictions and Places (12/13)

► Consolidated Federal Funds Report (federal expenditures) 1983-2010 (11/11)

► Migration data :

Jobs and Income

The jobs and income section has personal income estimates from the U.S. Bureau of Economic Analysis for states (quarterly and annual) and Maryland counties (annual). Jobs by place of work data from the U.S. BEA are available for states and Maryland counties annually.

Also available from this site are annual job estimates for Maryland (and other states) from the current employment statistics(CES) program. There is a difference in coverage between the BEA and CES data. The BEA series is more comprehensive in that it includes federal military, railroad, household, agricultural, and other workers not covered by the unemployment insurance system. In addition, the BEA data includes estimates of proprietors. As a result, BEA job estimates will always be significantly higher than job estimates from the CES program.

The County Business Patterns data on this site are an analysis of high tech and biotech establishments available at the zip code level.
